MARINE PRODUCTS

ROBBINS TIMBER

General Information

We have over 100 years of experience in the timber trade, and are proud of our reputation for fast and efficient service along with our keen pricing policy. We also have a vast knowledge of the best materials for use in a marine environment.

Because of our wide range of stock, we are able to offer several options of plywood, many species of hardwood and softwood and a wide range of adhesives, epoxy and fastenings to suit different budgets.

In buying from Robbins Timber you will be sure of receiving fast and efficient service from a company which knows the marine market and

employs staff who are knowledgeable about the products we sell.

All prices in this catalogue are based on small order quantities, and are subject to VAT. We offer an attractive range of volume discounts for retail customers undertaking larger projects, and offer Trade Discounts to all genuine trade users and merchants stocking our products.

Mail order is simple with Robbins Timber - all we need to know is what you require and we will work out the details. We have NO minimum order, can deliver anywhere in the world, and accept all major credit and debit cards.

Please Note: All prices are subject to addition of VAT and correct at time of going to press (1 January 2018).
Prices and Specifications may change without notice.

All goods are sold subject to our current Terms and Conditions of Sale - full details available on request or from our website.

General Information

All marine plywoods from Robbins Timber are exclusively manufactured to our specifications, and are of the highest quality, and approved under one or more of the following respected standards: BS1088, Lloyds Register Type Approval, PS1-95, KOMO Class 'A' or 'C'. The fact that one board has a standard which another of our boards lacks does not necessarily mean the quality is better or worse, it is usually an indicator of which management system our producing mill is working to. All our marine plywoods are made in mills which have been inspected personally by our directors, and carry our own guarantee of quality. If a particular standard or approval is critical for your project, please let us know at the time of order which you require. We are always happy to discuss which is the appropriate board for your project. Full details of the above standards are available on request.

ROBBINS SUPER-ELITE PLUS

BS1088 Marine Plywood **Guaranteed for 25 years**

This is our top-of-the-range board, and the first choice of many renowned boatbuilding craftsmen for its aesthetic qualities! It is made from multi-laminate mahogany veneers for stability, and has extremely high quality Rotary Sapele faces. It is ideal for epoxy coating, clear finishing or painting. Designed for high loading uses where strength is a pre-requisite, it has a superb fine sanded face veneer quality. Super-Elite Plus is extremely resistant to fungal attack and is ideal for persistently wet and dry environments, and high hazard areas such the Tropics. Used and approved in high risk applications, and manufactured to BS1088, KOMO Class 'A', 'C' and Lloyds certified.

Cost: Medium to High

ROBBINS SUPER-ELITE PLUS

ROBBINS ELITE

BS1088 Marine Plywood **Guaranteed for 15 years**

Our best selling board! Exclusively produced to our specification, ROBBINS ELITE is produced in a Lloyds approved mill ensuring consistent quality. With a pale mahogany colour, it is ideal for fitting out and general constructional work, along with many other uses such as bulkheads, panelling, cabin and shower doors etc.. Manufactured from selected Gaboon (Okoume) veneers throughout, it has an attractive close grained face which is ideal for varnishing and finishes well. Due to its excellent strength to weight ratio, it is also very popular for dinghy construction and racing boat building.

Cost: Medium

Machined Mouldings

We are able to produce virtually any moulding in any timber to your specification. Please contact our Sales Office with your requirements who will be pleased to provide you with a no obligation quote.

Hardwoods and Softwoods

With over 200 years of timber trading, Robbins Timber are proud to continue the tradition of maintaining large stocks of high quality hardwoods and softwoods from around the world. We have an excellent reputation supplying high quality timber to the marine trade due to our wealth of knowledge built up over many years. All our staff are trained in the products we sell in order to help you make the right choice of timber for your project.

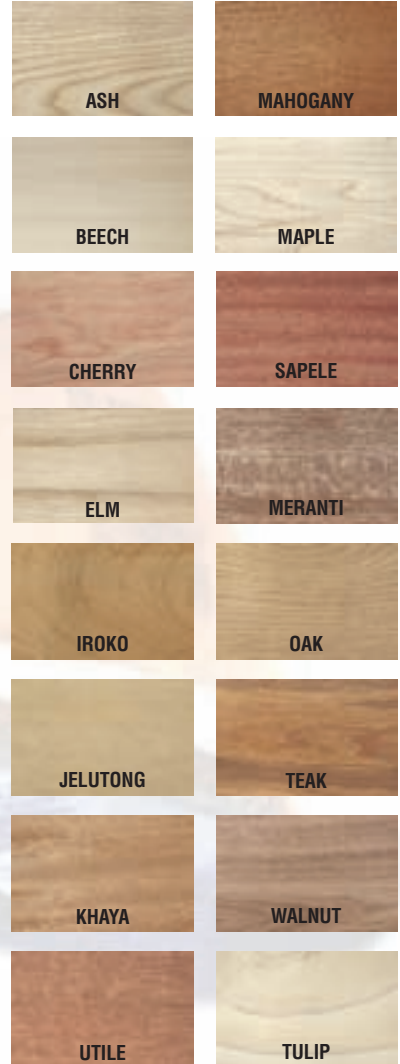

Timber prices on the following pages are intended to give you a guide price for small order quantities of our more popular timbers. If you have a larger enquiry, special requirements, or need a timber which is not listed please contact us for a no obligation quote. Please note sizes listed are subject to availability.

Our purchasing department work very closely with our supplying mills to ensure the cut and grades of timber we purchase are suitable for our customers needs, meaning that we are able to provide the widest choice of timber at very competitive prices.

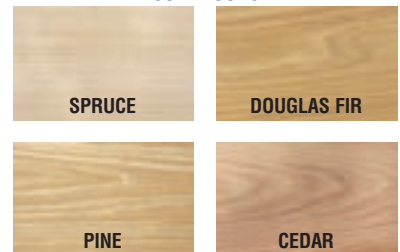

We can machine any type of timber into virtually any moulding to your specification with no minimum order quantity! We operate one of the largest milling facilities in South West England, with highly trained machinists and modern computer controlled machinery. We supply an increasing number of our manufacturing customers with machined components giving them the opportunity to reduce manufacturing costs and simplify their purchasing of timber products.

Our environmental policy means that we constantly seek to increase our range of hardwoods and softwoods which are proven to have been produced from sustainable sources. We hold both FSC and PEFC Chain of Custody Accreditation and are able to supply an ever increasing range of products which are certified under these and other schemes.

Teak – the Quality option

Why Choose Teak?

Providing outstanding beauty, strength & durability, Teak is the perfect choice of timber for all types of yacht & boat building. Teak is generally straight grained of medium texture and appears golden brown when first cut darkening with exposure to light & age. Teak has been the preferred timber for Decks, Rubbing Strakes, Gunwales, Cabins and Internal Joinery for nearly 150 years.

Durability

Teak can claim “Durability Class 1”, the highest possible. It is extremely resistant to marine borers and is impervious to sea water. A deck laid in Teak is guaranteed to out-last any other comparable species available.

The Origin

Our Teak comes mainly from natural forests within Asia. In more recent times fast grown plantation Teak has been available from places such as Nigeria but the quality is inconsistent, and unsuitable for marine applications.

Sizes Available

We source both square edged boards and whole felled logs, and offer the widest range of sizes available anywhere in Europe. Our stocks of logs enable us to offer widths up to 20” and thicknesses ranging from $\frac{3}{4}$ ” - 4”, and lengths from 3’ to 20’.

Classic Decking

There is nothing better than the look of Classic Teak decking and for years Robbins Timber have provided customers with the very best decking grade Teak backed by our reputation for quality. Available in a wide range of sizes we can provide beautiful decking to your specific requirements.

Why Quarter Sawn?

Traditional cutting of sawn logs have almost disappeared and with it, the skill to produce stable boards for decking. Robbins Timber still offer this traditional cutting service which results in a more stable and even wearing deck.

Trims & Mouldings

We offer a full machining service for mouldings and trims to complement both decking and joinery projects.

Fixing & Caulking

We are national distributors for both West System epoxy resins & SABA sealants, and offer full technical support & advice on all our products. SABA is the preferred caulking for the professionals and as the UK’s leading distributor we offer exceptional value for money.

Teak Plugs

Cross grained Teak Pellets available in $\frac{3}{8}$ ” & $\frac{1}{2}$ ” diameter (other sizes available to order) add the finishing touch to all your Teak projects. Tapered pellets provide a good colour match and are very easy to fit

Plywood & Veneers

We have the UK’s widest range of Teak plywoods, in Marine and Exterior grades, Cabin Sole and our exclusive Teak Decking with rubber inlay. We also hold large stocks of decorative and constructional veneers for cold moulding.

Maintaining Teak

We stock and recommend a wide range of quality products including **Deks Olje**, **Epifanes**, and **Rustins Danish Oil** for finishing, and **Net-trol** for restoration work.

Environmental

Wood is the most environmentally friendly and durable asset that we have, provided it is handled in the right way. Well managed forests will provide timber in the future, and the Teak we supply has been sourced from well managed forest resources on a strictly sustained yield, thanks in part to the original efforts of a German, Dietrich Brandis who's detailed research provided government and forest companies of the day with invaluable information regarding the potential of well maintained forestry. These practices are still applied today ensuring future economic stability of the forest and continued supply of this wonderful natural material.

Affordability

Teak is without doubt the most desirable timber for boat construction and is surprisingly good value for money. With guaranteed durability and a pleasing appearance it is the natural choice. Robbins Timber offer exceptional value for money with a superb range of sizes & profiles.

- Ideal for Epoxy coating!
- Fast construction times!
- We supply a wide range of adhesives, Epoxy and all other materials for completing your project!

* subject to availability

Minimum order quantity at these prices is 30m. Strip sections can be supplied in any size and any type of timber. Please call our Sales Office who will be pleased to quote for any special requirements you may have.

Collano Semparoc is a simple, cost effective and reliable waterproof glue which is easy to use in a wide variety of conditions. It is often used in marine projects for normal bonding applications prior to Epoxy coating due to its comparative low cost and minimal waste.

Because **Collano Semparoc** cures by contact with the natural moisture present in all timbers and plywoods, it can be used in many situations where other types of glue would fail. Being a single part adhesive, waste is virtually eliminated, and excess cured glue can easily be removed from the work piece using a scraper. Collano Semparoc is a solvent free adhesive, and once cured is resistant to weak acids, alkalis and a large number of organic solvents.

EPIFANES PAINTS & VARNISH

EPIFANES VARNISHES

Highest quality marine varnish. This varnish is manufactured with a long base of 100% tung oil combined with non-yellowing urethane and alkyd resins blended with a perfected balance of ultra violet filters

World famous for its high gloss retention, long lasting properties, unique flowing characteristics and high build capacity, it is regarded by many as the finest of all yacht varnishes.

EPIFANES YACHT ENAMELS

Vivid colour brilliance, superior covering and flowing properties are the hallmarks of these high gloss enamels. The finest components possible give a hard protective finish meaning it is the preferred paint for many of the world's finest yachts, giving long lasting protection in any climate.

EPIFANES MONOURETHANE PAINTS

An innovative one-part urethane formula developed to give the tough durability of a two-part system while providing the application ease of standard enamels. This finish results in a higher gloss than given by conventional urethane methods and fully cures to a remarkable degree of hardness in just 24 hours.
